

June 16, 2015

The 2nd tourney of 2015 on Lake Koronis was completed this weekend and with 18.30lbs, **Team StrikeForce – Aaron Grefsrud and Derek Jacobson took 1st place!** Besides being the most weight they have brought in for any tournament, this is their first time placing in the money and top spot. Congratulations and good luck on continuing your winning ways!

Attached are the results, please review and let me know if you see any errors. Attached is a picture of the results board to help confirm. **The Bassassins** have amassed a slight lead to start the season but things can change quickly in the Team of the Year points race!

Pictures and results are also posted on the [Walser Bass Tour Facebook page](#) by Jesse Larson. Send him any pictures from the weekend and he can get them loaded to the album out there as well.

The overall and team results from Lake Koronis were nothing short of spectacular as well! Comments at the weigh-in were that the results must make this one of the top tournament totals the WBT has experienced; one person remarked that 15lbs and being in 10th place tells quite the story. To help confirm these statements and enlighten you with a handful of other interesting data points, look for a separate email that will include past WBT records, top 5 weights, averages, etc! For a teezer, let's just say that the total weight on Koronis was *42.50lbs more than than the next highest overall tournament weight!*

Thank you to Paul Hecht ("Chef") for bringin the Rush Creek food seasoning for everyone and also to **Rob Bolke** for the Gander Mountain fishing line! We are close to finalizing the updated WBT logo colors, the related apparel options will be following close behind that. Thank you to **Rocky Novak and Lucas Matzke** for assisting on that front.

Despite the success of the tourney, we witnessed Dane Dornbush's trailer getting hit by some rogue driver, more to come on that front but there is hope that the DNR boat checker has enough info to go on. He appreciated everyone's support in helping with finding that idiot. For Jeremy Abbott, feel free to reach out to this group with any questions on your motor or recommended mechanics. I've personally witnessed the support from this group that has mutual empathy on these annoyances and are anxious to help/ solution if you want to reach out to us.

Next tournament is on July 12th at Lake Pepin and the Mississippi River

We are launching out of the same location at the Hok-Si-La Park ([Link to Directions](#)) as in July 2012. At that event, 12 teams caught around 89 lbs of bass with 14.95lbs winning that day.

Stay tuned for another email that highlights historical WBT data and results!
